THE BIOLOGICAL MILIEU: Disease & pathogens DO NOT exist within the Natural Order!

Symptoms erroneously labeled as “disease”, or attributed to pathogenic invasion are a result of the following factors:

- ▶ **INORGANIC ELEMENT DEFICIENCY**: The 12 Builders
- ▶ **ORGANIC ELEMENTS**: Any disruption in the conjugation of organic matter into the matrix of living cells under the directives from Inorganic Elements.
- ▶ **THE ELEMENTALS**: Ecobiont populations provide necessary functions specific to species & cyclic stage. Alterations within internal ecology via deficiency or poison leads to a chronicity of microorganism response or lack thereof, eventuating in the deterioration of the Bioterrain.
- ▶ **THE BIOLOGICAL-PSYCHE INTERFACE**: The biological expression of trauma to the psyche, as understood within New Germanic Medicine.
- ▶ **CONTAMINATION**: Electromagnetic, biochemical & mental-emotional toxicity.

## CELL SALTS DEFICIENCY

Aside from poisoning, any deficiency of the 12 Cell Salts constitutes the primary cause of symptoms attributed to “disease”.

- ▶ Cells can only utilize the constituents from which they are made, and anything else will be selectively rejected.
- ▶ The Inorganic Elements Provide the resonance-induced geometry to create the unique characteristics of every bodily tissue.
- ▶ If any of the 12 Cell Salts are deficient within the blood, both structure and function will be compromised.
- ▶ Deficiencies alert with typically unpleasant sensory feedback as an opportunity for early-onset correction.
- ▶ Any diagnosis of “disease” can only obfuscate what would otherwise be obvious, while further complicating physiology with the escalation of mental/emotional trauma.

# Cellular Nutrition

5

THE INORGANIC & ORGANIC ELEMENTS: Sufficient Inorganic Elements are required for the precipitation of organic matter into proper structure & function.

Dietary-Sourced: Digested foodstuffs comprise approximately 30% of the Inorganic & Organic Elements made available to the cells.

Atmospheric-Sourced: Approximately 70% of the Inorganic & Organic Elements made available to the cells are sourced directly from the pre-physical conducted through the etheric medium.

- Nitrogen is the purest form of Mineral concentration.
- ▶ Proportionate combinations of Hydrogen & Oxygen complexed with Nitrogen is the 1<sup>st</sup> phase of mineral differentiation.
- ▶ The 12 constellations impart the etheric resonance responsible for the Twelve Spectrum characteristics present throughout the Natural Order.
- ▶ Other Inorganic Bridge Elements play specialized roles.

Ionization Analysis: Biochemistry must be understood within the context of Electrical Resistance if the nutritional sciences wish to contribute to the cause of human health.

## THE ECOBIONT-EMBRYOLOGICAL CORRELATION

- ▶ Brainstem activation of a Biological Program requires Fungi/Mycobacteria for recycling & repair of Endodermal- derived tissues.
- ▶ Cerebellum/Cerebral Medulla activation of a Biological Program requires Bacteria/Mycobacteria for recycling & repair Mesodermal-derived tissues.
- ▶ Cerebral Cortex activation of a Biological Program requires Cell Debris-Mediated production of surfactants, exosome, stem cells etc. for cleansing & repair of Ectodermal-derived tissues.

## INTERNAL-EXTERNAL ECOLOGY HOMEOSTASIS

- ▶ 12 Meridian-mediation of Internal 12 Phase organ clock with macro Solar-Constellation Cycles.
- ▶ Resonant affinities via etheric transference between Ecobionts & Soil-Based Organisms/Mycellium.

# The Biological-Psyche Interface

THE BIOLOGICAL INTERPRETATION OF THE HUMAN PSYCHE: Mankind's evolutionary advantage to transition beyond instinctual reactions to consciously rational behaviors.

## EMOTIONALLY-CHARGED EVENTS:

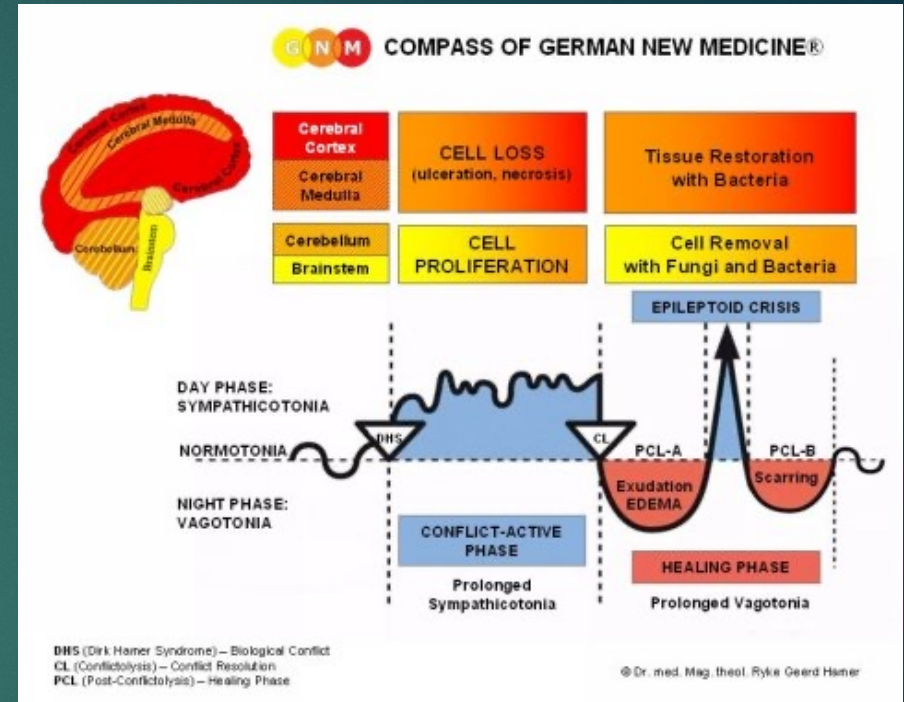

- ▶ Instinctual survival interpreted via societal Interactions.
- ▶ Requires an unanticipated insult with sufficient emotional intensity.
- ▶ Brain centers trigger corresponding tissues to biologically mimic the conflict within the psyche.

## BIOLOGICAL EXPRESSION PURPOSE:

- ▶ Relieve emotional pressure, consequent toxic metabolism & organ damage.
- ▶ Breaks cyclic, long-term repetitions of non-productive behaviors.
- ▶ Stress Patterns (acquired) vs Soul Patterns (Enneagram).

## IMPEDIMENTS TO FULL CIRCLE RESOLUTION:

- ▶ Inability to correlate symptoms with emotional conflict = hanging conflict.
- ▶ Deficiencies of the 12 Cell Salts.
- ▶ Decimation of microbial seed forms (protits) due to pharmaceuticals, microwaves & other contaminants. "Every emotion,

*Every ailment, has a complex logarithmic statement. ~ Joseph Scogna*
